

ADVENTURE EXPLORER

Totally practical, the ASIS Explorer has been packaged with certain useful accessories in addition to the basic features to enable customers to buy their boat in a hassle free format. This boat features the most suitable pilot position commonly needed, space for easy circulation, extensive deck and storage space and a swivel back rest for the back seat. Options are available to fine tune this boat to meet your needs.

The ASIS Explorer has been developed to withstand tough conditions and is built using the most robust materials. Its deep V hull is engineered for high lift and sharp entry attacks to allow air cushion and hull dynamic pressure to minimize water drag. The sharp entry with eight full length chines breaks the surface tension and allows for a flatter entry angle.
